

Description

The **FDCP109B** call point is designed to operate in extinguishing control systems.

It is used to delay the start of the extinguishing procedure by increasing the evacuation time. It must be installed near the extinguishing unit.

The short circuit and cutting cables of the fire alarm line are controlled.

Technical features

Protective cover	transparent
Cable section	0.4 : 1.5 mm ²
Operating temperature range	-10°C : 50°C
Humidity	(93 3 3)% at 40°C
Degree of protection	IP 40
Dimensions	(90 x 90 x 44) mm
Weight	0.120 kg
Materials	ABS plastic

* note: subject to load calculations and use of appropriate cables
