SAFETY SINCE 1977

Teledata has been designing and manufacturing safety electronic devices since 1977. In our early years, our company began its activities by creating custom electronic solutions for aerospace applications, serving large Italian and foreign groups. It was this foundation that paved the way for Teledata to reach the highest levels in the cutting-edge electronics sector. During this phase, Teledata expanded its horizons by developing specific security solutions, an area where standard mass-market solutions did not yet exist in the 1980s.

Over the years, Teledata continued to invest in the security sector, complementing system implementation with the mass production of high-tech products. Our company has maintained its focus on designing and manufacturing electronic equipment, continuously enhancing the value chain for end-users.

Today, Teledata offers a range of in-house manufactured products for all security and fire prevention systems. Our significant presence in the international market contributes to showcasing the excellence of **'Made in Italy'** worldwide. Additionally, Teledata actively participates in various working committees both in Italy and abroad, sharing experiences, needs, objectives, actions, and values to stay prepared for market trends and future prospects.

Hotels, Resorts & Restaurants

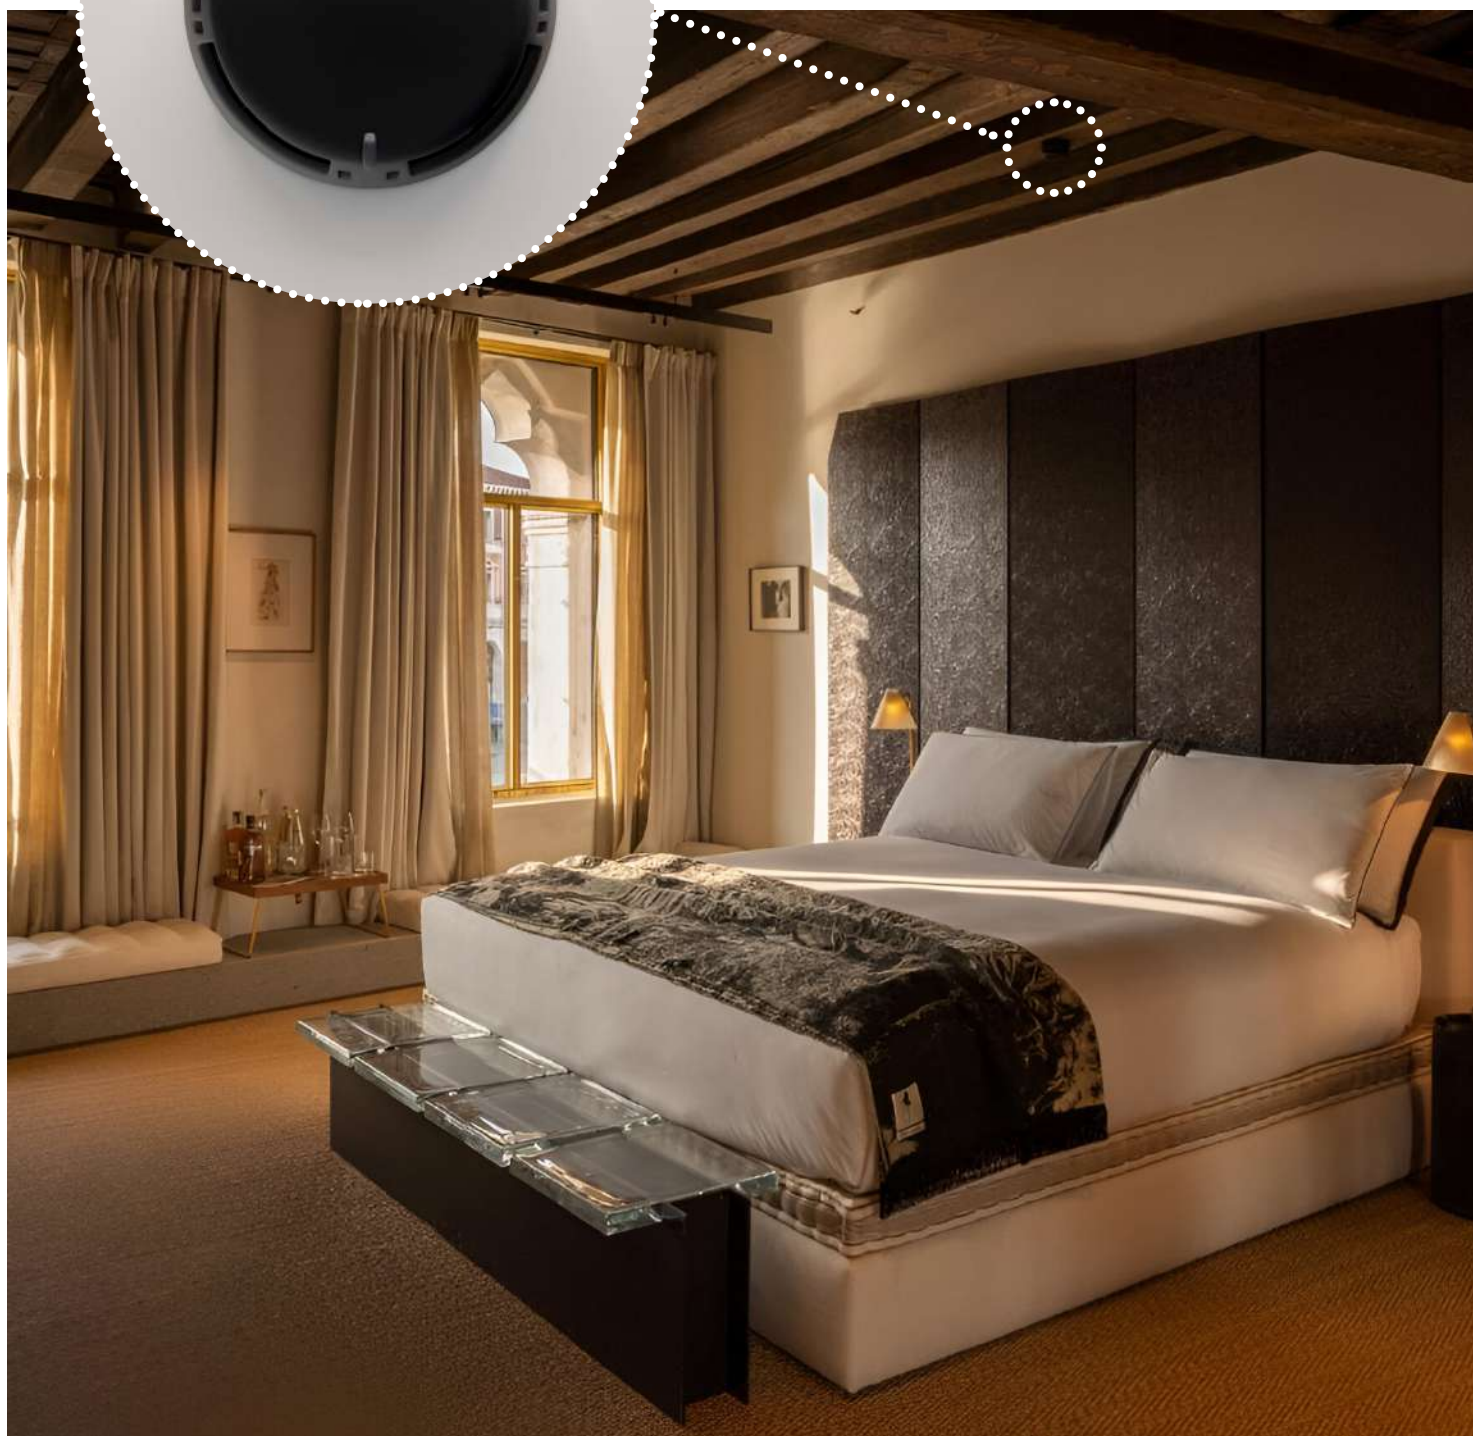

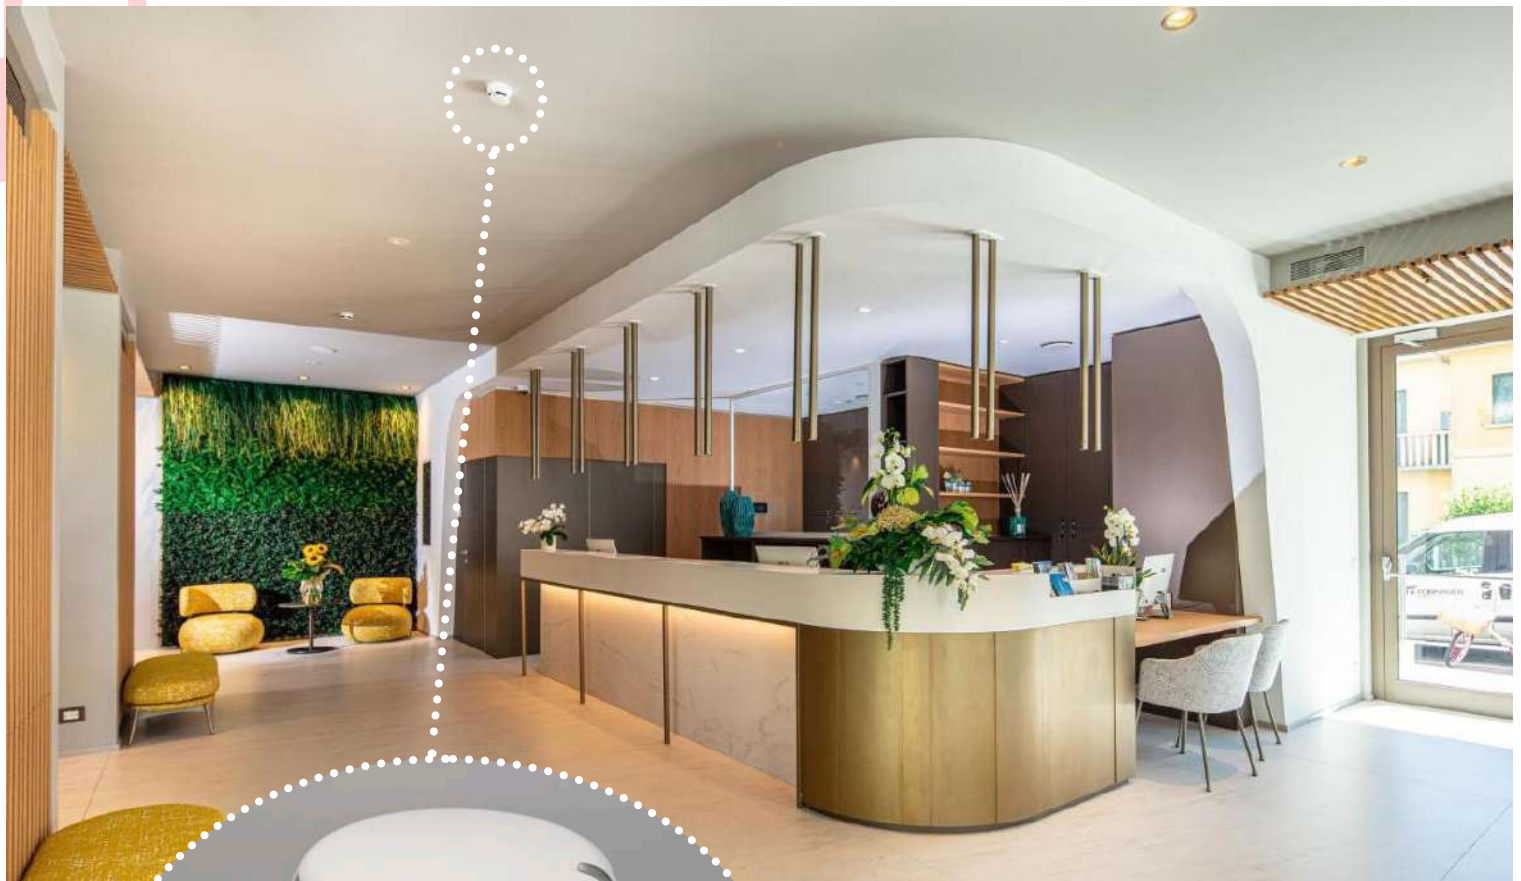

In Teledata, we understand the importance of ensuring **safety** and **well-being** of clients and staff. Our fire detection systems are developed with advanced technologies and extreme care for desing to ensure maximum protection to accomodations such as hotels and resorts.

Venice Venice Hotel- Venice, Italy

Our **OneDetector**, in custom black colour, installed in a room, ensuring protection to guests without compromising the aesthetics
